

APIs Integration Manual

Alsaboormaportal Group Customer Interface

Base Information

- **Domain:** https://alsaboormaportal.com/
- **Base URL:** https://alsaboormaportal.com/admins/api
- **Authentication:** Token
- **Content-Type:** application/json

Authentication

All API endpoints require authentication using a **token** in the **Authorization** header:

Authorization: **Token** YOUR_API_KEY

1. API for Login

This API endpoint allows users to log in to the application.

Request

Method: POST

URL : https://alsaboormaportal.com/admins/api/login

Response

- Status Code: 200
- Content-Type: text/html

Response Body (JSON)

```
{
  "status": "",
  "message": "",
  "token": "",
  "expiry": ""
}
```

Body formdata

email : khushabtravels@yahoo.com

password : Maryam@786

Agent_code : 1016

2. Get All Groups

<https://alsaboorportal.com/admins/api/groups?type=UMRAH%20GROUP&token=f7104b55cda61e8f479299e7020483f2b2ea3849d3af52ada830569408ac3f5d>

Endpoint Description

This endpoint retrieves a list of groups associated with a specific type from the **Al Saboor Portal Group** API. The request is made using the HTTP GET method.

Request Parameters

- type (query parameter): A string that specifies the type of group to retrieve. In this case, the value is "UMRAH GROUP".
- token (query parameter): A string that serves as an authentication token to authorize the request.

Example Request

GET /groups?type=UMRAH GROUP&token=YOUR_TOKEN_HERE

Response Structure

The response will contain a JSON object that includes the following key information:

- status: Indicates the success or failure of the request.
- data: An array of group objects, each containing details about the groups corresponding to the specified type.
- message: A string providing additional information about the request status.

Example Response

```
{
  "status": "success",
  "data": [
    {
      "groupId": "123",
      "groupName": "Group A",
      "description": "Description of Group A"
    },
    {
      "groupId": "124",
      "groupName": "Group B",
      "description": "Description of Group B"
    }
  ],
  "message": "Groups retrieved successfully"
}
```

PARAMS

type ONE WAY GROUP, UMRAH GROUP

token

f7104b55cda61e8f479299e7020483f2b2ea3849d3af52ada830569408ac3f5d

3. Get Group Details

https://alsaboortal.com/admins/api/group-details?group_id=381&token=f7104b55cda61e8f479299e7020483f2b2ea3849d3af52ada830569408ac3f5d

API Endpoint: Get Group Details

Description

This endpoint retrieves detailed information about a specific travel group based on the provided `group_id`. It is useful for obtaining essential details regarding the group's flight information, pricing, and available passenger capacity.

Request

- Method: GET
- URL: <https://alsaboorportal.com/admins/api/group-details>

Query Parameters

- group_id (required): The unique identifier for the travel group you want to retrieve details for.
- token (required): An authentication token that validates the request.

Response

On a successful request (HTTP Status 200), the API returns a JSON object containing the following structure:

```
{
  "groups": [
    {
      "id": "",
      "airline_id": "",
      "dept_date": "",
      "arv_date": "",
      "sector": "",
      "type": "",
      "price": "",
      "baggage": "",
      "meal": "",
      "pnr": "",
      "group_price_detail_id": null,
      "available_no_of_pax": 0,
      "details": [
        {
          "id": "",
          "group_id": "",
          "sr": 0,
          "flight_no": "",
          "flight_date": "",
          "origin": "",

```

```

        "destination": "",
        "baggage": "",
        "dept_time": "",
        "arv_time": ""
    }
],
"airline": [
    {
        "id": "",
        "airline_name": "",
        "short_name": "",
        "logo_url": ""
    }
]
}
]
}

```

Response Fields

- groups: An array containing details of the requested group.
- id: The unique identifier of the group.
- airline_id: Identifier for the associated airline.
- dept_date: Departure date of the group.
- arv_date: Arrival date of the group.
- sector: Flight sector information.
- type: Type of the group (e.g., business, economy).
- price: Price details for the group.
- baggage: Baggage allowance information.
- meal: Meal options provided.
- pnr: Passenger Name Record for the group.
- group_price_detail_id: ID for group pricing details.
- available_no_of_pax: Number of available passengers.
- details: An array containing individual flight details, including:
 - flight_no: Flight number.
 - flight_date: Date of the flight.
 - origin: Departure location.
 - destination: Arrival location.
 - baggage: Baggage information for the flight.
 - dept_time: Departure time.
 - arv_time: Arrival time.

- airline: An array containing airline information, including: airline_name: Name of the airline.
- short_name: Short name or code of the airline.
- logo_url: URL to the airline's logo.

4. Create Group Booking

This endpoint allows you to create a booking by submitting the necessary details in a structured format.

Request

HTTP Method: POST

URL: <https://alsaboorportal.com/admins/api/booking>

Request Body

```
{
  "token": "string",
  "roe": "string",
  "no_of_seat": "string",
  "group_id": "string",
  "pnr_1": "string",
  "pnr_2": "string",
  "pax_title": ["string"],
  "human_type": ["string"],
  "sur_name": ["string"],
  "given_name": ["string"],
  "pass_no": ["string"],
  "dob": ["string"],
  "doi": ["string"],
  "doe": ["string"],
  "adult_price": ["string"],
  "child_price": ["string"],
  "infant_price": ["string"]
}
```

Parameters Description

- token: A unique identifier for the session.
- roe: Reference of the booking.
- no_of_seat: Number of seats being booked.
- group_id: Identifier for the group booking.
- pnr_1, pnr_2: Passenger Name Record identifiers.
- pax_title[]: Titles for each passenger (e.g., Mr., Mrs.).
- human_type[]: Type of each passenger (e.g., adult, child, infant).
- sur_name[]: Surnames of the passengers.
- given_name[]: Given names of the passengers.
- pass_no[]: Passport numbers of the passengers.
- dob[]: Dates of birth of the passengers.
- doi[]: Dates of issue for the passports.
- doe[]: Dates of expiry for the passports.
- adult_price[]: Prices for adult tickets.
- child_price[]: Prices for child tickets.
- infant_price[]: Prices for infant tickets.

Response

On a successful request, the API will return a response in JSON format with the following structure:

- status: (string) The status of the request.
- message: (string) A message providing additional information about the request.
- transaction_id: (integer) The unique identifier for the transaction.

Response Example:

```
{
  "status": "",
  "message": "",
  "transaction_id": 0
}
```

5. Get Booking Details

https://alsaboorportal.com/admins/api/get-booking?token=f7104b55cda61e8f479299e7020483f2b2ea3849d3af52ada830569408ac3f5d&booking_id=3244

API Endpoint: Get Booking Details

This endpoint retrieves the details of a specific booking using the provided booking_id. It requires an authentication token to access the booking information.

Request

Method: GET

URL: <https://alsaboorportal.com/admins/api/get-booking>

Query Parameters:

- token (string): The authentication token required to access the API.
- booking_id (string): The unique identifier for the booking you want to retrieve.

Example Request

GET

https://alsaboorportal.com/admins/api/get-booking?token=f7104b55cda61e8f479299e7020483f2b2ea3849d3af52ada830569408ac3f5d&booking_id=3244

Example Response

```
{
  "id": "",
  "group_id": "",
  "agent_id": "",
  "agent_name": "",
  "adults": "",
  "child": "",
  "infant": "",
```

```
"total_fare": 0,
"group": {
  "id": "",
  "airline_id": "",
  "dept_date": "",
  "arv_date": "",
  "sector": "",
  "type": "",
  "price": "",
  "baggage": "",
  "meal": "",
  "pnr": "",
  "group_price_detail_id": null,
  "details": [
    {
      "id": "",
      "group_id": "",
      "sr": 0,
      "flight_no": "",
      "flight_date": "",
      "origin": "",
      "destination": "",
      "baggage": "",
      "dept_time": "",
      "arv_time": ""
    }
  ],
  "airline": [
    {
      "id": "",
      "airline_name": "",
      "short_name": "",
      "logo_url": ""
    }
  ]
},
"booking_details": [
  {
    "id": "",
    "booking_id": "",
```

```
"type": "",
"sur_name": "",
"given_name": "",
"title": "",
"passport_no": "",
"dob": "",
"doe": "",
"fare": "",
"status": "",
"created_at": null,
"updated_at": null
}
]
}
```
